# You are Invited to Visit Vaughan's Trial Grounds

FLORISTS who visit Vaughan's test garden, or "trial grounds," from July 15 until killing frosts arrive will find there both a beautiful spectacle and a valuable source of trade information.

Hundreds of varieties of annual and perennial flowers are grown in carefully labeled rows, for the purpose of observation and comparison. All entries in the "All-America Trials" for new flowers are grown here each year. Many novelties not entered in this contest are also tested. Each year a different group of standard varieties is grown to see whether quality is being improved, as it should be with correct breeding methods; and above all to see which grower has the best strain.

Where several growers produce the same variety, one may progress faster, and his strain may far surpass others. By growing samples side by side, we determine the best source from which to buy.

The seedsman who insists that his list be comprehensive must cover the world in his search for new varieties.

Since 1884 we have kept intimate contact with flower breeders everywhere. Periodical trips abroad have been made through this half century, and since flower seed breeding developed on a large scale in our country, centering in California, trips of inspection to

View of Vaughan's Test Gardens, West 47th street and Willow Springs road, Western Springs, Ill., where more than 800 different annuals are grown, including All-America contest entries.

the growing fields have been made several times each year.

But the final test of a grower's reliability comes in the growing test in our trial grounds.

By this extreme and costly care we are enabled to offer our customers the "world's best flower seeds."

# Vaughan's Novelties and Specialties for 1940

**AGERATUM King of the Blues.** Excellent dwarf strain, flowers borne in clusters of deepest blue but stand out individually, showing up most effectively over the miniature foliage. Trade pkt., 35c; ¼ oz., \$1.00; oz., \$3.00.

**AGERATUM Midget Blue.** This was awarded a silver medal in the 1938 All-America Trials but was withheld by the introducer until this year, as seed was limited. Midget Blue is a delightful little plant for edging, being uniformly dwarf and true to color from seed. The delicate fine foliage is practically smothered with small true Ageratum blue flowers. Trade pkt., 50c; ¼ oz., \$1.60.

**ALYSSUM Violet Queen.** A new edging plant with a color peculiarly its own, being of a very pretty bright violet tint much deeper in color than the Alyssum Lilac Carpet offered previously. It has the usual honey-like odor of the white variety. Trade pkt., 25c; ¼ oz., 50c; oz., \$1.60.

**ANCHUSA Avalon Hybrids.** Gracefully irregular with crosier-sprays of mellow cream, soft primrose, palest blue, azure, indigo, rose, pink, even carmine, in re-starring. Scarcely two flowers alike. Trade pkt., 35c.

## ANTIRRHINUM RUST-PROOF STRAINS

By growing Rust-Proof seed, there is a better germination, plants are more vigorous, foliage remains clean and the flowers are large and of excellent color. There will be a longer flowering season as well.

**Majus Grandiflorum Brilliant Rose.** A good clear true rose-pink. The tube and lip are the same color, with faint yellow touch. Trade pkt., 50c.

**Rosalie.** A rich deep rose with underlying tone of topaz or amber. The tube and lip are the same color which intensifies the depth and richness. Plants base branching, producing 6 to 8 flowers on spike. Trade pkt., 50c; ¼ oz., 85c; ½ oz., \$1.50; oz., \$9.00.

**Maximum or Super Giants Pink Sensation.** Pure pink, frilled flowers. Trade pkt., 25c; ¼ oz., 80c; oz., \$3.00.

**Super Majestic, Royal Crimson.** Trade pkt., 50c; ½ oz., \$1.00; ¼ oz., \$1.75; oz., \$6.00.

**Shell Pink.** Trade pkt., 50c; ½ oz., \$1.00; ¼ oz., \$1.75; oz., \$6.00.

**Giant Tall, Golden Rod.** Plants are base branching, 26 in. tall, with many unusually thick, erect, well filled spikes of large, bright golden yellow flowers, the edges of which are delicately waved and crinkled. This gives an unusual frilled or fringed effect that is most pleasing. Trade pkt., 50c.

## ANTIRRHINUM NON-RUST STRAINS

**Little Giant.** A pure silvery pink, plants about 15 inches tall and of true nanum habit. Almost majestic in size of flowers. Trade pkt., 50c.

**Baby Rose.** The plants are of real "baby" size, forming full round bushes covered with flowers of a deep pink self tint. Especially suited to the rock garden and for edging. Trade pkt., 50c.

**ASTER Early Giant Rose Marie (Wilt-Resistant).** A rich lively shade of rose. Flowers are fully petaled, with broad, graceful petals, daintily plumed and intertwined, and very large, 4-5 in. in diameter. While flowers resemble the Giants of California, the plants differ in that they are only 1½ to 2 ft. tall, with branches coming low on the central spike. Only 6 to 8 flowers are produced on each plant. Trade pkt., 50c.

**CALENDULA Sensation Improved.** Dark orange, a greatly improved strain. Trade pkt., 40c; ¼ oz., 60c; oz., \$2.00.

**CALENDULA Yellow Colossal.** Well formed bushy plants growing 18 inches high, loaded with extremely double clear bright yellow flowers 4½ inches and more across. The lightest color in the lemon-yellow group. Fine for cut flower purposes as well as for use in the borders, edgings and beds. Trade pkt., 50c.

**CARNATION J. M. Bridgeford (Malmaison).** A truly giant type of the "Margaret" class, flowers 3-4 inches across, borne on stiff stems and of all tints known to date, yellow being prominent among them. Seed should be started indoors and seedlings will bloom in three months. Trade pkt., 50c; ½ oz., \$1.00.

# Vaughan's The World's Best Flower Seeds

Seeds supplied to florists by Vaughan's Seed Store are gathered from all over the world, each from that section where either the experience of the grower or conditions of soil and climate, or both of these factors, produce the best seed of its kind.

Seeds cannot be judged, as are most other goods, by inspection. Little can be told about the flowers they will develop from any test of the seeds themselves except the test of growing; each year we make hundreds of flower trials in our own greenhouses as additional check-ups. We purchase seed only from growers whom we know to be experienced and reliable; and you must depend upon our ability, experience and integrity.

Seed buying requires that we keep in constant touch with our growers throughout the world, and check the seeds we buy of them constantly.

Carl Cropp, vice-president of Vaughan's Seed Store since 1884, and his son Carl Jr. each made a trip of inspection to the California flower seed farms at different seasons last summer and passed much of the summer in checking trials in our extensive test garden at Western Springs, Ill. Here were grown hundreds of tests as well as the All-America trials of new introductions, of which Mr. Cropp is one of the judges.

Neither time nor expense is spared to insure that we can offer to our customers the best seeds obtainable in the world.

**TESTING AND TRIALS** Every lot of flower seed sold by us is tested in OUR OWN Laboratory, where we prove the germination and make certain that the percentage is up to the high level of our standards. Trueness to type is determined and checked by the hundreds of tests grown in our greenhouses and trial grounds. This summer we conducted a series of approximately eight hundred trials of various varieties further to check on the reliability of our seed.

**Flower Seeds for Summer Sowing.**—We issue a special catalogue in June. Should you fail to receive one, please write for it.

**For Seeds of Perennials and Biennials,** see pages 34 to 47.

**Trade packets** contain considerably more seed than ordinary or retail packets, being based on Florists' needs for ordinary purposes.

Florists invariably get trade packets unless otherwise specified.

Quantities of  $\frac{1}{4}$  lb. and over are charged at the pound rate; unless stated otherwise,  $\frac{1}{4}$  lb. is at the oz. rate;  $\frac{1}{2}$  oz. is at the ounce rate only when the price per ounce is 20c or more and  $\frac{1}{2}$  oz. rate is not otherwise quoted.

We do not sell  $\frac{1}{2}$  oz. where the price per ounce is 15c or less.

**Cash Discounts on Flower Seeds:** On all orders for flower seeds totaling less than \$25.00, 5%, and over \$25.00, 8%, may be deducted if cash is enclosed.

# Vaughan's Wilt-Resistant Asters

Asters have been widely attacked by the Fusarium Wilt, which condition has been overcome in growing the Wilt-Resistant Strains, which, although grown in infected soil, proved immune to the disease. Aster Yellows is also an enemy. This has been found to be transferred to the plants by tiny insects called leaf hoppers, and the only way to overcome this is to grow the plants under a cloth cover.

As the roots of Asters are produced near the surface, a mulch of some kind spread over them in hot weather is very beneficial and will be repaid by fine plants, large blooms, stronger stems, and more profuse blooming.

The color is pure deep cornflower blue. Sown in April the plants will flower freely from October onwards and a June sowing can be relied upon to produce plants to be at their best about Christmas-time.

The earliest-sown plants will grow to a height of 3 feet, whilst the later-sown ones may attain only about 2 ft. Seeds should be sown in moderate heat and for the final potting 8-inch pots are suitable. From October onwards an atmosphere of about 55 degrees will be necessary to produce the best results. ## Annual Larkspur

For outdoor blooming start in flats in the house, shift into 2-inch pots and plant in April or sow in the open as soon as ground is ready. To get satisfactory germination from Larkspurs in the hot summer, it is necessary to chill the seeds in an ice box for several days before sowing. Larkspurs must be grown cool. For a greenhouse crop in May, sow in January or February.

Annual Larkspur bought in the wholesale market was suspended in a cool, airy spot where it was allowed to dry for 60 days. When taken out it had not shattered and the color upheld.

### GIANT DOUBLE IMPERIAL—4 ft.

## GIANT MIXTURES

**Vaughan's Long Stemmed Winter-Flowering Reselected Mixed.** This strain is the result of a great amount of individual plant selection work and represents the finest strain of Long Stemmed Pansies that we have ever seen. It has a much wider color range than other Winter-Flowering strains and has an excellent stem length, averaging better than 10 in. The bloom size is from 2 1/2 to 3 in. and the flowers are of very good substance. Sow in summer for midwinter blooming. Trade pkt., \$1.00; 1/8 oz., \$2.00; 1/4 oz., \$3.50.

## VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick petals, of a rich velvety texture, give this strain of pansy the required substance so necessary to a perfect pansy.

The superb colors and color combinations—salmons, yellows, pinks, rich reds and blues, are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 50c; 1/8 oz., \$1.00; 1/4 oz., \$1.80; oz., \$6.00; 2 oz., \$11.50; 4 oz., \$20.00.

## VAUGHAN'S SUPER SWISS GIANT MIXTURE

We have made a special mixture from three or four growers' stocks. Many of the flowers are five blotched. All the vivid colors of the type are represented in their enormous size and wavy and crinkly flowers. Trade pkt., 75c; 1/8 oz., \$1.20; 1/4 oz., \$2.10; oz., \$7.00.

## SWISS DWARF MIXED

### PLEASE NOTE:

Highly bred double petunia seed is not as vigorous in growth as is that of single strains. To some extent this lack of vigor extends to the seed. Seed of our all-double strains has been carefully tested in soil, and, if carefully handled, we know it will germinate 60-70%. For this reason and because of its high cost we cannot entertain claims of non-germination of this seed. If handled with due care, we know it will grow.

## Seeds of Biennials and Hardy Perennials

Perennials fill a large and interesting place in the operations of an up-to-date florist establishment. Some are as easily raised as annuals; quite a few may be forced; others make fine pot plants; and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to perennials of all kinds. They require little heat, if any, and not much care.

## Suggestions For Sowing Seeds During the Summer Months

During the hot months of July and August fine seeds such as Calceolaria, Cineraria, Snapdragon, and finer perennial seeds, etc. should be sown in flats (as usual) and the flats placed in a cool basement until the seedlings sprout, when taken to greenhouse and some cheese cloth placed over them until the seedlings are of sufficient strength to have it removed.

## AMARYLLIS

### Large Flowering Hybrids

One of the finest strains of Amaryllis we have ever seen, raised by eminent growers whose stock and hybridization for many years we have purchased in its entirety. Flowers are immense, borne as a rule four to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains.

2-2½ inch.....	\$2.00	\$15.00
2½-3 inch.....	2.75	20.00
3-3½ inch.....	4.50	30.00

## ACHIMENES

This is closely related to the Gloxinia. Plant 6 to 7 bulbs in a 5-inch pot, or 9 to 10 in a 6-inch pot. The soil used for potting should be rich in humus and of an open, porous nature, allowing perfect drainage. A good mixture to use is equal parts of loam, leaf mold and sand. About one-third of the depth of the pots or pans should be occupied with drainage. After the young growth appears, great care should be taken to keep the soil moist, for a single severe drying will ruin the plant. Blooming time 8 to 10 weeks after planting.

Purple and Light Blue.....	\$0.35	\$1.80	\$13.00

## BEGONIAS

### Tuberous-Rooted

Every florist should grow some of these bulbs, as they make showy plants that find ready sales in the spring and summer. Use 4-inch pots and shift later to 5 and 6-inch pots if larger plants are wanted. A compost of one part rotted cow manure to two parts loam and one part leaf mold will give good results. Water sparingly until growth is started. They like a 55-58 degree temperature at night.

## The Big Four

**\*Improved Florence Vaughan** Owing no doubt to a deterioration in breeding stock, plants distributed under the name of Florence Vaughan have for several years been decidedly smaller, and inferior in color to the original variety, introduced by us. Making a search for stock of the original quality, we found it in Europe, and have propagated from carefully selected specimens to produce the improved type offered here. Giant flowers of vivid golden yellow, sprinkled with fine red dots, are borne on strong 4-foot stems. In our judgment, the best of all yellows. Per 100 Per 1000  
Green foliage.....10 for \$1.00 \$7.00 \$60.00  
3-inch pot plants.....14.00 140.00

**\*King Humbert** 4-FT. SCARLET FLOWERS, BRONZE LEAVES, GREATEST FAVORITE TODAY. This remarkable "Gold Medal" Canna has been the sensation of the past nine years. It is a cross between the orchid-flowering and the French or Crozy type, combining the best features of both, the large flowers of one with the free-blooming character of the other, and the handsome broad, tropical foliage. Dormant roots... 3.75 32.50  
3-inch pot plants.....11.00 100.00

**\*Yellow King Humbert** 4 feet. An orchid-flowering sport of the well known variety King Humbert. Has the same habit of growth as its parent; foliage a very dark green, with flowers measuring 5 to 7 in. across; individual petals 3 to 3½ in. in diameter. Color of flower a deep rich yellow, softly spotted and blotched with bright red. Some plants will occasionally give a scarlet or scarlet-striped flower, which we consider an improvement rather than a defect. Dormant Roots..... 3.75 32.50  
3-inch pot plants.....11.00 100.00

**The President** 4 ft. In color a rich glowing scarlet with immense rounded flowers seven inches across when fully open, produced on strong, erect stems well above the large green foliage. Free-bloomer and strong grower. Dormant Roots..... 3.75 32.50

# Vegetable Plants With a Pedigree

## Vaughan's Seeds of Table Quality Varieties are a Sure Selling Specialty

ONE of the most profitable spring crops for the greenhouse or hot-bed plant is seedling vegetable plants for home gardeners. Grow your plants from Vaughan's seeds and advertise the fact. It will bring you discriminating customers and higher prices. On this page we describe some of the varieties which we recommend for vigorous and fast selling plants.

For other varieties, see the vegetable list on the following pages or write for a copy of our retail catalogue, which gives a complete list of vegetables with full descriptions. By advertising that your plants are grown from Vaughan's seeds you will attract custom from the thousands who have received this catalogue.

### YELLOWS- RESISTANT CABBAGE

Through the cooperation of the Wisconsin Cabbage Growers and the University of Wisconsin, we are enabled to offer seed of yellows-resistant cabbage from lots which have been tested in the university trials.

These lots of seed are carried under stock numbers as itemized below, and orders for these numbers will be filled as long as the seed lasts. When the tested lots have been exhausted, we will supply at regular prices new crop seed grown from tested stock seed, which should have resistant qualities equal to the parent stock.

Percentage of yellows disease which developed in Dr. Vaughan's tests is shown for each numbered lot as follows:

Jersey Queen, stock 171C or M, 0%; All Head, stock 174R or S, 10%; Racine Market or Detroit, stock 186A, 10%; Wisconsin All Season, stock 191C or R, 4%; Wisconsin Hollander, stock 225W, 0%; Globe, stock 211S or A, 1%; Red Hollander, stock 194W, 1%; Marion Market, stock 206C, 4%; Wisconsin Ballhead, stock 215B, 0%.

In addition to the above, we offer seed of Bugner, 205S, from the same lot which was used by market growers at Racine, Wis., in 1939 with complete satisfaction, which experience we consider equal to a state test.

Seed of the numbered lots specified above is offered at an advance of \$1.00 per pound, 35c per  $\frac{1}{4}$  lb., 10c per oz., over the regular prices for same varieties as hereafter quoted.

### Resistant Golden Acre (Racine Market).

Matures in about 60 days. The earliest yellows-resistant cabbage yet developed. A solid, round head of excellent flavor, crisp and tender. Oz., 60c;  $\frac{1}{4}$  lb., \$1.75; lb., \$6.00.

### Marion Market.

75 days. The third yellows-resistant cabbage to mature. Of an excellent Copenhagen Market type, though later than select Copenhagen, coming a short time before Glory of Enkhousen. Oz., 45c;  $\frac{1}{4}$  lb., \$1.25; lb., \$4.00.

### ★Globe.

80 days. The resistant Glory of Enkhousen is but 3 to 4 days later than Copenhagen, of excellent flavor. You who think that there is no difference in the flavor of cabbage should compare a mature Globe with any other cabbage. Pkt., 15c; oz., 65c;  $\frac{1}{4}$  lb., \$2.00.

## Standard Bred Cabbages

### Reselected Copenhagen Market Extra

Early. Matures in about 62 days. Earliest of the large heading cabbages, maturing even before the conical types. Market growers have reported their entire crop of this strain harvested before heads from other seed of this variety were ready to cut.

Reselected Tested Stock. Oz., 40c;  $\frac{1}{4}$  lb., \$1.25; lb., \$4.00.

### Golden Acre.

Matures in about 60 days. This early round headed variety is slightly earlier than our reselected extra early Copenhagen Market and is similar in most other respects, except that its heads are slightly smaller, weighing 4 to 5 lbs. Oz., 30c;  $\frac{1}{4}$  lb., 90c; lb., \$3.00.

### GOLDEN ACRE DANISH GROWN.

Oz., 45c;  $\frac{1}{4}$  lb., \$1.25; lb., \$4.00.

### Glory of Enkhousen.

### Cauliflower Vaughan's New

#### Snowball. Matures

## Vaughan's New Snowball

One of our Specialties. We know our strain is the equal of any that can be produced. We have tried nearly every other on the market and we have never yet come across anything superior to Vaughan's New Snowball. It is the result of years of careful selection by a most capable and painstaking gardener who grows the seed especially for us on the island of Amagar, near Copenhagen, Denmark, where growing conditions are ideal for the production of perfect seed heads. Vaughan's New Snowball is the best general purpose variety for either spring or fall planting. Heads are usually 9 to 10 inches across, perfectly white, solid, deep and compact.

Pkt., 25c; ¼ oz., 70c; ½ oz., \$1.25; oz., \$2.00; ¼ lb., \$7.00.

# Vaughan's High Grade Fertilizers

Prices for Florists F.O.B. New York.

The Yield and Quality of Vegetation Depend Upon Continuous and Rapid Growth.

It has been demonstrated that crops of the best quality are those which are grown under conditions which permit of a continuous and rapid development. Plant food of the right amount and kind controls the yield and quality of prod-

ucts more than any other condition, and it is neither wise nor economical to depend upon the natural condition of the soil or the application of stable manure only for profitable crops.

## Vaughan's Lawn and Garden Fertilizer. (5-8-6)

Five percent nitrogen; eight percent phosphoric acid; six percent potash. This mixture differs from our balanced plant ration in that it is composed of plant foods in mineral form. The advantages of mineral fertilizer include the absence of objectionable odor, and the quality of being more readily soluble, which makes it more quickly effective upon plant growth.

For a new lawn, broadcast evenly 30 to 40 lbs. per 1000 square feet. To stimulate an old lawn, apply 20 to 30 lbs. per 1000 square feet, during the growing season, wash it down immediately with the hose to prevent burning. For flowers and vegetables, use from 4 to 6 lbs. per 100 square feet. Price, 100 lbs., \$3.00; 1000 lbs., \$25.00; 2000 lbs., \$45.00.

**Vaughan's Balanced Plant Ration. (5-8-7)** This is our best brand of concentrated manure, excellent for mixing into potting soil or as a top dressing. It is a money-maker. It is excellent for Carnations if applied by the end of October or in November. It can also be applied as a liquid manure by using an 8-inch potful to a barrel of water. Price, 100 lbs., \$3.25; 1000 lbs., \$25.00; 2000 lbs., \$45.00.

**Adco. Artificial Stable Manure.** Convert all non-woody vegetable refuse such as stalks, cuttings, weeds, withered leaves and flowers, vines, etc., into artificial manure. # Freshly Packed and Tested Lawn Seed in 1941 for Your Unsold 1940 Stock

## New Federal Seed Law Requires Dated Germination Tests

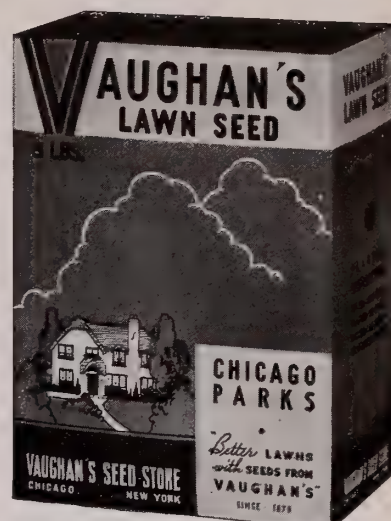

OUR dealers can purchase cartons and 5-lb. bags of our branded seed with no fear of carrying over out-dated seed into the following year. We will allow unsold packages to be returned to us and replace them with freshly packed and tested seed the following spring.

Dealers who have tried this plan report that it enables them to keep up stocks and get maximum sales throughout the season with no fear of inventory losses.

This offer is NOT in any way to be considered on a consignment basis but is solely for the protection of our dealers against having to carry into the following year unsalable, outdated and soiled cartons.

The terms of payment are absolutely the same as heretofore.

This offer does not apply in any way whatsoever to bulk seed or non-branded seed and this is in no way to be considered a guarantee sale. All seed to be exchanged must positively be returned to us by December 1, 1940, and replacement will be made by March 1, 1941.

Please forward, in due season, one assortment of garden and flower seeds for me to sell on commission for the season of 1940. I agree to display this assortment and the advertising material sent with it, in my store, and to sell all the seeds possible. On or after July 1, when requested by you, I agree to return the unsold seeds by parcel post, and to pay, upon receipt of statement, the retail value of the seeds sold by me, less 40% commission. Unsold seeds returned by me are to be credited, and only the amount of seeds actually sold, less 40% commission, is to be billed. I further agree, when season is ended, to destroy the display rack furnished by you with the goods.

**O**UR packet seeds are supplied on consignment on the usual terms, but with unusual display material and a unique method of direct delivery to you by parcel post. An assortment of flower seeds, or both flower and vegetable seeds as you choose, is sent you on consignment, to be sold at 40% commission. All flower seeds are 10 cents or more; some vegetables 5 cents, most 10 cents. Each rack is dated and bears a seed analyst's certificate of the purity and freshness of its seeds. At the end of the season you return the unsold packets in a bag supplied by us, and destroy the rack. You are credited with the returns and billed for the seeds sold, less 40%.

## Brilliant New Floor Display Racks

We continue for 1940 our floor display which was so popular and effective the past season.

The illustrations show how it holds each variety of your seed assortment where the customer can see it. Against the black background the vivid colors of the seed packets stand out like a veritable flower garden, catching the eye of everyone who comes near it and inviting further inspection.

The dimensions of this rack are: 30 inches wide, 15 inches deep, on the floor. The height is 55 inches, nicely calculated to combine maximum visibility of packets, and convenient self-service, while at the same time it does not obstruct a clear view of the store, which many feel is important.

Your new rack will be light, yet strong, easily moved about. It is made in the modern manner, of heavy matboard, and comes to you brand new. One rack will hold \$100 worth of packets retail value.

**Our New Packets.** All flower seed packets of 1940 will be 3¼ by 4½ inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower seed or vegetable seed packets or both.

**Brilliantly Colored Posters and Streamers.** Color sells everything now-a-days and nowhere is it more necessary than in selling the garden. Vaughan's posters are modern, artistic, brilliant. They will dress up your store and give it the atmosphere of spring, helping business in every line.

# 500 1st Size Glads, 10 Named Varieties, and Display Box

**\$7.50**

Retails for \$16.00

Gladiolus Display Box Holding 500 1st Size Bulbs, 50 each of 10 Named Varieties

F. O. B. Chicago or New York

**V**AUGHAN'S GLADIOLI are famous. For years they have been nationally advertised. You have only to put this box on your counter to sell out quickly.

We use **FIRST SIZE BULBS**, the size which sells best over the counter. The 10 named varieties (50 each) include the show winners **Picardy, Maid of Orleans, Dr. Bennett, Wasaga, Dearborn, Edith Mason, Cadillac, Minuet, Kalamazoo, Emile Auburn**—none better known. The price to you is \$9.00 for the box and 500 bulbs of 10 named varieties. You retail them for 40 cents a dozen, or more, because the selection is worth more, doubling your money. Each variety is packed 50 in a bag labeled with its name. You empty one bag into a compartment, and refill in the same manner when it is empty. This prevents mixtures and loss of bulbs. Colored pictures are provided to paste on the compartments. This box keeps the bulbs in the open air, thus preventing bacterial rot which comes when they are sealed in cartons. The named varieties are kept apart without mixing, which adds greatly to their value.

Varieties Subject to Change Without Notice.
